
RELEASE PLAN

FairShare

Team : Fairshare

Release Name : FairShare

Release Date : 06/03

Revision Date: 5/27

Team Members :

- Zidu Chen
- Alexis Mabugat
- Danny Phan
- Andy Wong

High Level Goals

- Geolocation and get the tax rate of your location and auto fill out
- Split bills automatically by taking a picture of a receipt
- Split bills unevenly by assigning people to items and calculating it
- Have friend groups so that we can easily find and charge people
- Be able to notify users of new charges or any news that's happening with the app
- Charge interest on some payments on a weekly/monthly basis

User Stories

Sprint 1

- [3]As a user I want to be able to split the bill between multiple users depending on the items that they have, so that I can charge people for the items that they bought.
- [1]As a developer I want to have more payment options on my app, so that my clients will have a easier time using it.

- [5]As a user I want to be able to store pictures of my receipts, so that I can review my charges.

Sprint 2

- [3] As a user, I would like to take a picture of my receipt and upload it to the app
- [3] As a user, I would like to create a group with my friends and be able to charge everyone in the group
- [1] As a user, I would like to be able to charge interest on payments that I request to incentivize my friends to pay sooner

Sprint 3

- User Story 1 -- [5]As a developer, I want to implement geolocation so that I can auto calculate tax based on the user's location to make it easier for the user to use the app.
- User Story 2 -- [5]As a user, I want to be notified of charges made so that I can make payments on time and not be charged interest.
- User Story 3 --[3] As a user, I would like to distinguish items and prices from my receipt, so that I don't have to manually input it.
- User Story 4 --[3] As a user, I would like to charge all users I choose, after I split the bill unevenly.
- User Story 5: [1]<- amount work left [3] As a user, I would like to create a group with my ~~called~~ friends and be able to charge everyone in the group

Sprint 4

- User Story 1 -- [5]As a user, I want to make sure the app isn't confusing, so that I can use it efficiently.
- User Story 2 -- [5]As a developer, I want to implement geolocation so that I can auto calculate tax based on the user's location to make it easier for the user to use the app.

- User Story 3 -- [5]As a user, I want to be notified of charges made so that I can make payments on time and not be charged interest.
- User Story 4 -- [3] As a user, I would like to scan my receipt and be able to see the items I purchased on the app
- User Story 5 -- [3] As a user I want to see details about what is being charged, so I can see the tax rate and etc.
- User Story 6 -- [3] As a user I want to know if my receipt got parsed correctly, so I can make changes if needed.
- User Story 7 -- [1] As a user I want to be able to include tax and tip in the bill split process, so that it simplifies my job.
- User Story 8 -- [3] As a user, I would like to create a group called friends and be able to charge everyone in the group

Sprint 5:

- User Story 1 -- [5]As a user, I want to make sure the app isn't confusing, so that I can use it efficiently.
- User Story 2 -- [3]As a user, I want to have individual charges to users, so that I can have different options for people im charging.
- User Story 3 -- [3]As a user, I would like to create a group called friends and be able to charge everyone in the group
