Sprint 3 Plan

Product Name: FairShare
Team Name: FairShare Team
Sprint Completion Date: 4/28/19
Revision Number: 1.0
Revision Date: --

Goal: To fix bugs and implement new features

Task Listing, **Organized by User Stories**

- User Story 1 -- [5]As a developer, I want to implement geolocation so that I can auto calculate tax based on the user's location to make it easier for the user to use the app.
    - Implement geolocation.
    - Create or find a library that links both tax and city.
- User Story 2 -- [5]As a user, I want to be notified of charges made so that I can make payments on time and not be charged interest.
    - Implement timed notifications
- User Story 3 --[3] As a user, I would like to distingues items and prices from my receipt, so that I don't have to manually input it.
    - Parse out data from OCR to find total and items. With reg expressions
    - Add validation page
- User Story 4 --[3] As a user, I would like to charge all users I choose, after I split the bill unevenly.
    - Pass variables to charge people uneven screen.
    - Have a charge all button.
    - Be able to edit those payments.
- *User Story 5:* [1]<- amount work left [3] As a user, I would like to create a group ~~with my~~ called friends and be able to charge everyone in the group
    - FINISH AND IMPLEMENT

Total Story Points: 17

Scale
- From 1 to 9 (odd numbers)
    - 1 = very easy, 1 person can do it
    - 3 = easy, may have multiple people working on the task if needed
    - 5 = moderate, multiple people have to work on the task
    - 7 = hard, we have an idea of what to do, multiple people have to work on the task
    - 9 = very hard, no clue what to do/whole team effort
